Introducing 80/20's latest drawing file DVD, packed with more than 13,000 part drawings in six file formats. Find information on all components listed on 3DContent Central at your fingertips without Internet access. The DVD also includes PDF catalog files and AutoQuoterX™. Getting what you need when you need it has never been faster or easier. SolidWorks® Compatible Drawings AutoQuoterX™ Design Software Made With 80/20 Application Books

SMC tubing rack (seen in the photo) is ideal for holding large rolls of tubing of various sizes.

Tubing sold separately

High Pressure Digital Pressure Sensor.

Tired of guessing? Spending too much time retuning or recalibrating your equipment? If increased productivity and decreased costs sound too good to be true, imagine having both without having to sacrifice performance. SMC proudly introduces the new ISE30A series.

- Easy 3-step parameter setting
- Pressure, vacuum & compound ranges
- Power-saving function
- Red/Green display
- Inexpensive

The ISE30A series is a 2-color display, high precision digital pressure sensor. Gone are the days of inaccurate unclear pressure monitoring.

IPEC has been serving Canada's Factory Automation Needs since 1982. At IPEC we are always happy to share our knowledge with our valued customers. We have the solutions for all your manufacturing needs.

IPEC stock a range of pneumatic, electronic & mechanical components to build new automated work stations or to maintain the old ones. We also have all the accessories required to finish any job the right way. Our well trained staff can assist you in choosing the proper components for you application.

A Complete Line of Digital Pressure Sensors for the Automation Industry

Improving upon our ISE30 platform, the new ISE30A (pressure) and ZSE30A (vacuum) digital pressure sensors feature many new options. These high precision, compact sensors are optimal for both machine and panel mounting. The 2-color display transitions from red to green based on process changes. These changes can be monitored as either digital and/or analog outputs. Other features include:

- 10x copy function
- Expanded pressure and vacuum ranges
- 2 digital outputs
- Power-saving function
- Replaceable one-touch fittings
- Unbeatable value

Additional Digital Pressure Sensors

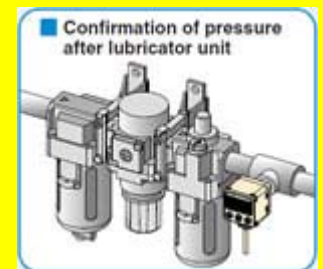

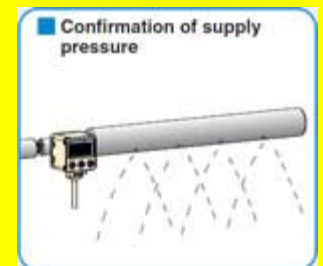

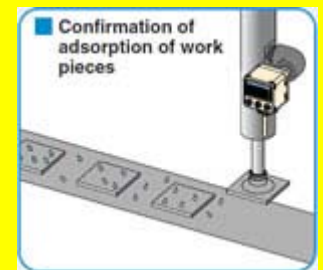

The ISE10 series is a different style of pressure sensor, suitable for those seeking a slim, multi-channel solution to their pressure sensing needs. Top and side indicator lights allow users to visibly confirm outputs from multiple angles. The ISE10 can be mounted in several different orientations, and has the ability to be panel or DIN rail mounted.

If pressure or vacuum sensors are required for a wet path application, check out our new ISE80 series. With a stainless steel diaphragm, applicable fluids range from air containing drainage to hydraulic oils. VCR and Swagelok compliant fittings are also available for low leakage applications.

SMC Sensor Applications
