## INTERACTIVE

### The New Interactive Aluminum Extrusion Catalogue

[Metric & Imperial Sized Extrusion](#)

You will be impressed with the latest addition to the [www.8020.net](http://www.8020.net) Web site it's their [interactive catalogue](#)! View the catalogue in a whole new way by jumping from one page to another with the click of your mouse.

The new interactive catalog is just like having a real catalog in your hands. You can zoom in on any page to view high-resolution photos and drawings for any 80/20® product. Move throughout the book by turning the page or using the slide bar, simply click directly to the page you need!

The new interactive catalog also offers an extensive search function. Enter a part number or description to view a list of corresponding pages to select from.

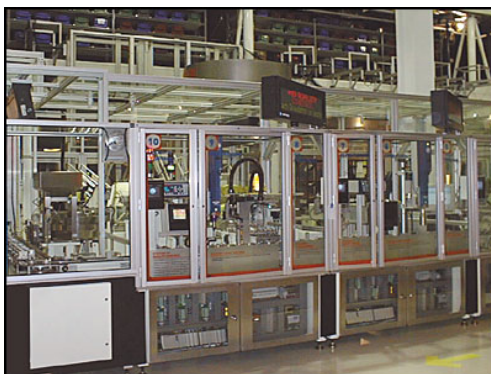

This can also be [viewed by visiting \[www.ipecautomation.com\]\(http://www.ipecautomation.com\)](#). Should you wish a van demo visit, a quote or some questions answered be sure to call your sales representative.

T-slot aluminum extrusion are so versatile that you can build just about anything.

### IN-HOUSE DESIGN, MACHINING & ASSEMBLY

**The Perfect Combination - Modular & Safety:** IPEC can measure, design, and build your machine guard in as little as 48 hours. Bill C-45 states that your plant must be up to code and a failure to comply with this Bill could cost you \$100,000.00 in fines and also shut down your plant until you are up to code. Penalties apply to everyone from the CEO right down to lead hands. IPEC has the solutions to make your manufacturing facility a safer place to work.

IPEC is pleased to announce that at a recent show in Mississauga we were presented with an award from our customer for **Devoted Lifetime Service**

SMC's open house in the fall of 2007 was a huge success. Check our web site in IPEC News for any upcoming events. They opened their factory, served lunch to all and demonstrated some of their many different products. Many of our customers attended to get a tour of the warehouse to get a better understanding of the company we have distributed for, for many years. SMC also demonstrated E-tech which many people are finding to be a valuable tool.

SMC Stays on the cutting edge of technology through extensive research and development and application support from over 100 engineers in the U.S. alone. Try their new ETECH system at [www.etech.com](http://www.etech.com) to view an array of Industry Leading Pneumatic and Electro-Pneumatic Products Tailored for the needs of your industry.
